AI strategy, systems and implementation

Studio Baggio helps businesses identify where AI can create measurable value, then designs, builds and implements the systems needed to deliver it.

WHAT YOU CAN HIRE US FOR

SEO & AI Search

Be found and chosen when prospective clients search Google or ask AI who to hire. We find the questions that matter most to your business, where you appear today and who appears instead, then give you a prioritised plan within 14 days that your team, your partners or Studio Baggio can implement.

AI Operating Systems

AI set up around your business: your clients, your strategic priorities, your people and what good looks like to you. Each person starts with the context for their role, and their specialist knowledge and templates become skills they use every day. It's built to grow with the business, so your team is set up to win from the outset.

Tools & Client Resources

Focused internal tools and client-facing resources built around a specific problem, such as a diagnostic, a client guide or a reporting tool. Typically two to three weeks once the brief is agreed, built into your own systems or hosted for you. Fixed fee, no subscription.

Commissioned Research

Bring us the question you need answered: what prospective clients ask before they choose an adviser, how competitors are positioned, or where demand is going unmet. We agree the scope and method, then deliver the findings with the evidence behind them and what they mean for your business.

HOW AN ENGAGEMENT WORKS

01 Start with a brief or with discovery

A clear brief for a tool or a study goes straight to scoping. Where the opportunity is less defined, we start with two to three weeks of focused discovery, producing a prioritised plan: what to implement first, what can wait and how success is measured.

Discovery and planning fees are fully credited against implementation or ongoing consultation.

02 Build and implement

Implement the plan internally, with existing partners, or appoint Studio Baggio to design, build and embed the recommended systems, processes and client-facing resources.

03 Ongoing AI partner

Priority advice, optimisation and practical support, developing the strategy and taking new opportunities as the business grows.

SEO & AI Search

Be found and chosen when prospective clients search Google or ask AI who to hire. We find the questions that matter most to your business, where you appear today and who appears instead, then give you a prioritised plan within 14 days that your team, your partners or Studio Baggio can implement.

AI Search Strategy & Implementation Plan

WHAT THE PLAN COVERS

- High-value client searches and questions.
- Current Google and AI-search visibility.
- Competitor and citation performance.
- Technical, content and authority gaps.
- Priority pages and site structure.
- Implementation and measurement plan.

WHAT THE PLAN TELLS YOU

- Your highest-value buyer questions.
- Where you appear today.
- Who appears instead.
- Which sources influence AI answers.
- What authority, pages and evidence are missing.
- What to implement first.

Delivered within 14 days. Fee fully credited against implementation of the recommendations and wider consultancy.

EXAMPLE

A chartered financial planner who had relied entirely on referrals won nine new clients in eight months, adding **£5.3 million in assets under management and £103,400 in first-year revenue**. Four of those client journeys began with a ChatGPT recommendation.

"SEO & AI SEO were something we were never able to master. Jayme changed that completely: we went from page four to first on Google - above Microsoft, and we show up in AI search for the key buyer questions our customers ask. The advantage this gives us is invaluable."

Result: **more than 20 additional enquiries through AI search within two weeks**.

AI Operating Systems

AI set up around your business: your clients, your strategic priorities, your people and what good looks like to you. Each person starts with the context for their role, and their specialist knowledge and templates become skills they use every day. It's built to grow with the business, so your team is set up to win from the outset.

WHAT THE PLAN COVERS

- The constraints and opportunities where AI can make the biggest measurable difference.
- The shared company, department and role context the system needs.
- How each person turns their specialist knowledge and templates into skills they use in their work.
- How the system retains corrections and improvements, so it gets better as the team uses it.
- Client experience: how advice and client outputs are delivered, and how to make them clearer, more personal and more valuable.
- What to implement first, a sequenced 30 and 90-day plan, and where not to invest yet.

"Jayme spent time with people across the team individually to understand how we work, then came back with a detailed breakdown of where AI would be useful and how it should be set up across the business. She then built and implemented the system for us: our company and client knowledge, business strategy, positioning and templates built in, with each person's setup tailored to their role. People picked it up quickly because it was built around their actual work, and several of the team have since developed their own tools with it, including a live client-facing reporting platform and a deal-tracking tool, which they would never have been able to do previously. I'd be very happy to recommend Jayme to another team considering similar work."

Joe Churchill · Founder & CEO

EXAMPLE

For a London creative agency, a company-wide system gave a non-technical team the tools to use AI effectively from day one, saving an estimated **10 to 15 hours a week**.

Tools & Client Resources

Focused internal tools and client-facing resources built around a specific problem, such as a diagnostic, a client guide or a reporting tool. Typically two to three weeks once the brief is agreed, built into your own systems or hosted for you. Fixed fee, no subscription.

Studio Baggio keeps the IP. Your rights to use the tool, plus any hosting or running costs, are agreed in writing before work starts. Larger systems are scoped separately.

THIS CAN INCLUDE

- Client diagnostics and checks.
- Client guides and planning tools.
- Internal reporting and tracking tools.
- Research and market intelligence tools.
- Websites and resource hubs.
- Lead intelligence, through the Business Tracker.

BUSINESS TRACKER

The Business Tracker is Studio Baggio's own lead-intelligence software, and can be built in as part of any system we deliver.

It brings together engagement from guides, diagnostics, email, LinkedIn and other channels, then adds current professional and company information to show who each person is and why they may matter.

Each contact is qualified against the business's commercial priorities, with a clear rationale and recommended next action. Depending on the objective, the system can prioritise prospective clients, existing relationships, introducers, journalists or strategic partners.

EXAMPLE

Studio Baggio built Last30Days, an AI research tool now used by **more than 400 individual and corporate users**.

Commissioned Research

Bring us the question you need answered: what prospective clients ask before they choose an adviser, how competitors are positioned, or where demand is going unmet. We agree the scope and method, then deliver the findings with the evidence behind them and what they mean for your business.

EXAMPLE QUESTIONS

- What do prospective clients ask before choosing an adviser?
- Which firms appear in AI answers, and what supports their visibility?
- How are competitors positioning a particular service?
- Where is there evidence of unmet client need?

PUBLISHED STUDIES

- UK Financial Advice Firms in AI Search 2026
- UK Law Firms in AI Search 2026
- UK Sports Law in AI Search 2026

EXAMPLE

Studio Baggio's studies of how AI recommends UK law firms and financial advisers have been covered by **The Lawyer, FT Adviser and Professional Adviser**.

FT FINANCIAL TIMES Professional Adviser THE LAWYER

What clients say

"There's a lot of noise around AI, and most of it has nothing to do with how a business like mine actually wins clients. Jayme cut straight through it: she understood how our clients find and choose us, and built around that. It's the first time AI has felt like an advantage rather than a distraction."

Charlotte Evans MBE · Financial Planner

"Jayme has a rare ability to bridge technology, marketing and commercial growth in a way that actually makes sense to advisers. The result was meaningful visibility that translated into conversations, introductions and new clients."

Harry Sims APFS · Chartered Financial Planner, Fairstone Wealth Management Ltd

---

"Jayme was fantastic. The positioning strategy and business model she put together were first class. It was clear why she is leading the way in this space. Strongly recommend."

Luke · Head of Growth, independent financial advisory firm
